

FB CONNECT ECOSYSTEM

An open API, a system you own, and FB Connect.

Together they make an open ecosystem: FB Connect builds any automation or integration a dealer needs in minutes, on an open API, in a system the dealer owns outright.

EVENT DRIVEN YARD AUTOMATION

01

Gable event

An invoice or an order changes in Gable.

02

Trigger

FB Connect receives the webhook.

03

Sync

Writes the change into accounting, dispatch or the CRM.

04

Notice

Sends the customer a text or an email.

WORKFLOW EXAMPLES

Invoice posted	Post the journal entry to the ledger and send a payment link.
Delivery completed	Send the photo proof of delivery to the site superintendent.
Price updates	Read buying group price files and queue catalog updates.
Stock low	Draft the reorder purchase orders.
Payment confirmed	Tell the credit manager the account is clear and notify the salesperson.

IN NUMBERS

700+
pre-built connector pieces

Open
API on every part of Gable

$0
API fees or connector surcharges

WHAT CONNECTS

Through FB Connect and the open API: accounting software, point of sale terminals, card processors, vendor price catalogs, plan takeoff through Zero Gravity Takeoff, and text and email messaging.

BUILD YOUR OWN

When something custom is needed, developers build it on the open Connector SDK.
